AN INTEGRATED APPROACH TO TRAINING, AN INTERACTIVE APPROACH TO LEARNING.

Recognized as a leading innovator in road safety education, the DriveWise Mobile Unit has helped train thousands of professional drivers, servicing paramedics, police, firefighters, municipal vehicle operators, snowplow operators, bus drivers, corporate fleets and trucking organizations around the world.

ON-BOARD INTERACTIVE CLASSROOM:

The Mobile Training Unit can be used as the classroom for an entire program or as the simulation lab in-between classroom based learning.

Utilize your own classroom with the Mobile Training Unit to train up to 20 participants a day!*

*Based on a 5 to 1 student to instructor ratio and our 4 hour Advanced Driver Education Program. 2 programs can run simultaneously in the AM with another 2 in the PM.

ON-BOARD DRIVING SIMULATOR & OPCON

Depending on the program being held, the simulator in the Mobile Training Unit can be substituted for either a PatrolSim* or TranSim*.

The Mobile Training Unit allows for High Fidelity Virtual Reality training to come to you.

*The PatrolSim is best paired with passenger vehicles, taxis, emergency vehicles, etc.

*The TranSim is best paired with training for heavy trucking vehicles, fire apparatus, bus, snowplow, etc.

YOUR OWN MOBILE TRAINING UNIT:

If you provide your own training on the go, DriveWise can help with the creation of your very own Mobile Training Unit to aid in Virtual Reality Simulation based driver training.
